Professional Summary

Product Designer with 6+ years of experience designing scalable enterprise SaaS products and complex ERP modules for thousands of active business users. Specialized in data-heavy workflows, dashboard UI, design systems, and user-centered UX strategy. A strong background in front-end engineering ensures seamless developer handoffs, rapid prototyping, and high-fidelity execution. Proven ability to operate autonomously in remote, cross-functional teams to bridge the gap between user needs and technical implementation.

Core Skills

Design & UX: Product Thinking, UX Research, User Flow Design, Information Architecture, Lo-Fi & Hi-Fi Prototyping, Design Systems, Usability Testing, Enterprise/SaaS Design, and Agile working process.

Tools & Remote Collaboration: Figma, Adobe XD, Framer, AI-Driven Design (Figma Make, ChatGPT+Claude), Jira & Slack.

Frontend: HTML, CSS, JavaScript, React JS+Next JS, GSAP, AI+Code and Git

Professional Experience

Sr. UX Designer • Mononsoft Ltd. (JMI Group) Dhaka, Bangladesh | May 2024 – Present

- Accelerate the design process by up to 30% using AI-driven tools for research, ideates, and rapid prototyping.
- Design multi-role enterprise dashboard screens used daily by 5,000+ internal users across data-driven ERP modules.
- Translated complex, data-heavy business requirements into intuitive, highly actionable dashboard interfaces.
- Lead the end-to-end UI/UX design life-cycle for SaaS enterprise ERP products, driving projects from initial requirements to final delivery for pharmaceuticals and manufacturing industries.
- Reduced formal process time by ~60% through strategic data validation workflows and seamless UX designing.
- Works with cross-functional teams to build business-focused, multi-role user handing system.
- Keeps updates with system, manage track records and implement feedback and delivery.

- Work closely with Product Managers to drive client projects from scratch to final product launch.
- Understanding requirements and create user-flow, wire-frames, and information architecture for the design process.
- Analyzed complex user problems and delivered optimized solutions through deep UX research and strategic ideation.
- Build design system and component library, scaling reusable layouts across 50%–75% of active project areas.
- Smooth developer hand-offs with robust design documentation, significantly reducing technical constraints.
- Design rationale, presentation, and collect feedback to build project successfully.

- Designed complex dashboards for Sales and Distribution (S&D) and Production Planning (PP) ERP modules.
- Created reusable graphic elements, visual assets, and central design resources to scale the UX process.
- Reviewed and validated front-end code implementations, identifying UI inconsistencies and guiding CSS/HTML fixes.
- Creating the reusable graphics elements, visual assets, and design resources for scaling design.

- Designed UIs in Adobe XD and developed robust front-end code using HTML, CSS, JavaScript, and Nuxt.js.
- Managed the complete design-to-code pipeline, including ideation, research, high-fidelity design, and final delivery.
- Built SEO-friendly and highly responsive web pages to ensure consistent user experiences across all devices.
- Improved core performance metrics and page insights through systematic code optimization and W3C validation.
- Improved performance and page insights through code optimization and validation.

EDUCATION

BSc in Computer Science & Engineering Uttara University	2021
Diploma in Computer Engineering Mymensingh Polytechnic Institute	2016
